"The workers booed Bob King off the platform"

At the Dearborn Truck Plant today, Wednesday, the Unit's elected leadership passed out a letter calling for a NO vote.

The letter was signed by the plant chairman, the vice-president, and about half of the elected district and bargaining committee reps.

In response, Bob King came in to the plant on the afternoon shift. The company shut down production to have him speak. The workers booed Bob King off the platform and would not let him speak.
