

# Solidarity for GM Workers in Europe

Wednesday, June 27, 2012 11:00:48 PM

To our sisters and brothers who are resisting plant closures at Opel/GM and Peugeot:

We send this message of solidarity in full support of your day of action against plant closures, and wish you great success. The auto corporations world wide insist that workers must sacrifice for the sake of the bosses' profits and CEO bonuses - even sacrificing their jobs and the well being of their families and communities. We stand with the French and German autoworkers who say this is wrong, and support their demands to keep their plants open. A job is not a privilege - it is a fundamental human right!

Long live international solidarity!
